

Serial No. 10/601,739

19. (new) A caliper brake cover in combination with a caliper brake housing supporting a set of brake pads on opposite sides of a rotor disc and disposed in back of a decorative motor vehicle wheel having circumferentially spaced openings, said cover comprising a rigid non-rotating body including a substantially vertical and flat front wall and a laterally extending and arcuate outer rim wall rigidly connected to said front wall, a rigid support for said cover and positioning said cover with said front wall extending radially inwardly between said wheel and said caliper brake housing and covering said housing and said brake pads, said front wall and said outer rim wall having opposite ends terminating generally adjacent opposite corresponding ends of said brake housing, said support positioning said outer rim wall extending around said brake housing with said rim wall and said front wall providing a clean and smooth appearance of said caliper brake housing when viewed through said openings in said wheel, and said front wall and said rim wall cooperating to reduce the collection of brake dust on said wheel and within said openings while permitting a flow of cooling air through said openings and between said cover and said caliper brake housing and between said opposite ends of said front wall and said rim wall in response to rotation of said rotor disc between said brake pads.

20. (new) A caliper brake cover as defined in claim 19 wherein said front wall and said arcuate outer rim wall comprise integrally connected portions of a single piece of sheet metal.

21. (new) A caliper brake cover as defined in claim 19 wherein said front wall and said arcuate outer rim wall have a substantially uniform thickness.

Serial No. 10/601,739

22. (new) A caliper brake cover as defined in claim 19 wherein said front wall and said outer rim wall are integrally connected and comprise one piece of rigid material.

23. (new) A caliper brake cover as defined in claim 19 wherein said rigid support comprises tab portions integrally connected to said outer rim wall of said cover.

24. (new) A caliper brake cover as defined in claim 19 wherein said rigid support for said cover comprises a threaded fastener engaging said caliper brake housing.
